Mr. Clay Bernick
Director of Environmental Affairs
City of Virginia Beach
Environmental Management Office
Municipal Center
Virginia Beach, VA 23456

Dear Mr. Bernick:

In late 1986, Congress passed the Superfund Amendments and Reauthorization Act (SARA) (PL 99-499) which requires departments, agencies and instrumentalities of the Federal Government to comply fully with the requirements of the Superfund program. The Superfund program mandates reporting of releases to the environment of hazardous substances and conducting response actions to clean up hazardous waste sites caused by past disposal practices. One of the Act's requirements is to develop a Technical Review Committee (TRC) to review and comment on proposed actions to clean up contaminated sites. This committee must include representatives from federal and state regulatory agencies along with local government and community representatives.

In response to our December 10, 1991 letter, the Mayor's office has designated you as the city representative to NAB Little Creek's TRC. We therefore would like to meet with you at our next TRC meeting, which will be held in conjunction with the Atlantic Division, Naval Facilities Engineering Command at 9:00 a.m. on February 5, 1992 in the Pleasure House Room of the NAB Little Creek Officer's Club. We also request that you designate a community representative from your city to attend, and advise them of the date and location of this meeting.

Two copies of the Interim Remedial Investigation Report for the sites under investigation are enclosed. These findings will be discussed at the meeting. Please provide one of these copies to your community representative. We request that you provide any written comments on this report no later than February 21, 1992 if you are unable to attend the TRC meeting in person.

Please contact Anne Marple at 363-4846 by January 29, 1992 to advise us whether you will attend.
